Ensuring Compliance & Data Resilience for Financial Services

Industry: BFSI | Banks, NBFCs, Insurance

Customer Challenge

Financial institutions operate under strict data retention and compliance mandates from regulators such as RBI, SEBI, and IRDAI. However, legacy infrastructure, high maintenance costs, and manual backup processes expose them to operational risks.

To remain compliant and resilient, these organizations need a secure, long-term data archiving solution with fast access for audits and investigations. Failure to comply can result in heavy regulatory penalties.

Solution

Vaultastic addresses these challenges by offering a secure, compliant, and elastic archival solution for emails, files, and SaaS data.

It automates data capture, enforces policy-driven retention, and simplifies access, while reducing infrastructure costs through built-in disaster recovery and elastic scalability.

Key Features

- Zero-touch automation for archiving live and legacy data
- Multi-level eDiscovery to support audits, legal needs, and investigations
- Policy-based retention for long-term, compliant data management
- Centralized dashboard for access control, supervision, and compliance tracking

Business Impact

Vaultastic helped financial institutions:

- Achieve regulatory compliance and reduce legal and audit risks
- Improve discovery and retrieval times for critical data
- Lower storage, infrastructure costs

Together, these outcomes enhanced governance, operational efficiency, and long-term business continuity.

Use Case
Centralized Archival & Recovery for Manufacturing Sector

Industry: Manufacturing | Mid & Large Enterprises

Customer Challenge

Manufacturing businesses often face fragmented data across platforms - from emails and cloud drives to CRMs - making it difficult to search, secure, and manage.

Siloed systems reduce visibility and slow down discovery. Data loss from employee exits or system failures further disrupts operations, impacting efficiency, continuity, and governance across plants, teams, and partner networks.

Solution

Vaultastic consolidates data from multiple sources into a central archival platform. It automates backup and retention, streamlines lifecycle management, and accelerates recovery, helping manufacturers improve resilience and productivity while cutting storage and licensing costs.

Features

- Cross-platform data capture from MS 365, Google Drive, CRMs, and more
- Elastic storage tiers for cost-efficient retention based on usage patterns
- Instant search and extraction across live and historical datasets
- Audit-ready logs, retention tracking, and incident management tools

Business Impact

Enabled manufacturing firms to:
- Boost data visibility and accelerate discovery speed
- Ensure compliance readiness across departments
- Reduce storage, licensing, and operational overhead

Thus resulting in better productivity, governance, and continuity across complex industrial environments.
